The Nenko GPS™ Process

Your Compass for International Success

We help you figure out where you are and how to get to where you want to go. We will work with you in any one of the four stages of developing international business.

Readiness Assessment ...

Are you prepared to go global?

We have a trademarked process that will help evaluate your goals and decide what you need to do to move into the global market.

Business Development ...

Where are you going? Who should you work with?

Our business matchmaking services will connect you with the right partners to meet your objectives. We can connect you with partners for sales, production, joint ventures, or investment opportunities.

Implementation ...

How do you get there?

Nenko will assist you to implement tactical plans that leverage your resources, both financial and human, and minimize lost time due to unfamiliarity with the international marketplace.

Ongoing Management ...

How do you maintain your success?

Success internationally requires ongoing attention to relationships and diligent management. Nenko's network of international associates provide local management and oversight on an ongoing basis.
